

# Teagasc Water Quality Week

Throughout the week of **Monday, 22<sup>nd</sup> March - Friday, 26<sup>th</sup> March**, Teagasc, in collaboration with the dairy processing co-ops and the Local Authority Waters Programme (LAWPRO), are running a Water Quality Week. The purpose of the week is to provide water quality focused information and advice to farmers to help minimise losses of nutrients, sediment and pesticides to water from their farming practices.

The week will cover a broad range of topics and will be available to farmers and the public primarily through digital media platforms and local print media.

Further information is available on [www.teagasc.ie/waterqualityweek](http://www.teagasc.ie/waterqualityweek), from your local co-op sustainability advisor and [www.watersandcommunities.ie](http://www.watersandcommunities.ie).

Date	Theme
Monday, 22 <sup>nd</sup> March	Water Quality and Catchment Management
Tuesday, 23 <sup>rd</sup> March	Utilising Nitrogen Inputs Efficiently
Wednesday, 24 <sup>th</sup> March	'Breaking the pathway' of Phosphorus and Sediment loss
Thursday, 25 <sup>th</sup> March	Protecting Water from Pesticide losses
Friday, 26 <sup>th</sup> March	Managing your Farmyard and Signpost Webinar
